

The Cloud-Based Platform for Remote Monitoring and Management

All-In-One Software for Network, Classroom, and Safeguarding. Manage and monitor your devices from wherever you, or they are, connecting from a centralized web portal.

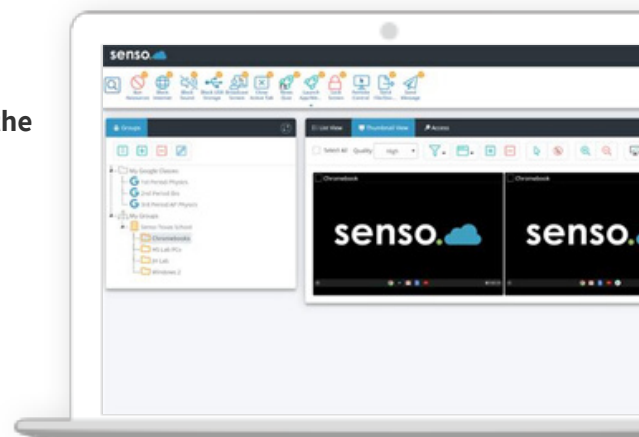

Chromebooks are a simple, secure, and shareable device that teachers and students can use to create, collaborate and make learning more engaging. They are the fastest growing choice of device for education within the UK – but how do you ensure they are being used appropriately?

Senso.cloud's Chrome Monitoring solutions have been developed in response to a demand from teachers and administrators to support the embrace of distance learning, ensuring students using these devices are kept safe, engaged and focused, wherever they are connecting from.

SENSO EDUCATION CHROME CLASS BUNDLE

Cloud based solution providing teachers with the tools to ensure learning remains at the core of the lesson, technology is enhancing the learning experience and distractions are kept to a minimum (also available on Windows Devices)

FEATURES:

✓ **Google classroom sync**

Senso.cloud syncs with Google Classroom so that pre-built classes and users will appear in the portal, making it easy for teachers to quickly monitor students and keep them on track.

✓ **Ban resources**

Quickly and easily block access to resources such as websites.

✓ **Ad hoc / Pin groups**

Portal users can now create PIN groups. These allow for clients, such as those from a 1:1 program, to be more easily grouped on an ad-hoc basis by entering a PIN.

✓ **Live thumbnail view**

Live view of the active screens of the students in your class.

✓ **Close active tab**

Closes the currently active tab in Chrome.

✓ **Block internet**

This module allows the internet to be disabled on the selected device(s)

✓ **Block sound**

Mute the volume of the remote machine (this will only mute the sound of the open tabs on a Chromebook not the whole device).

✓ **Block USB**

Disable removable media.

✓ **Broadcast screen**

Broadcast a student or teachers screen to the rest of the group.

✓ **Launch websites and extensions**

Remotely launch websites and Chrome extensions.

✓ **Lock screen**

This module will allow you to lock a remote machine so it cannot be used.

✓ **Send message**

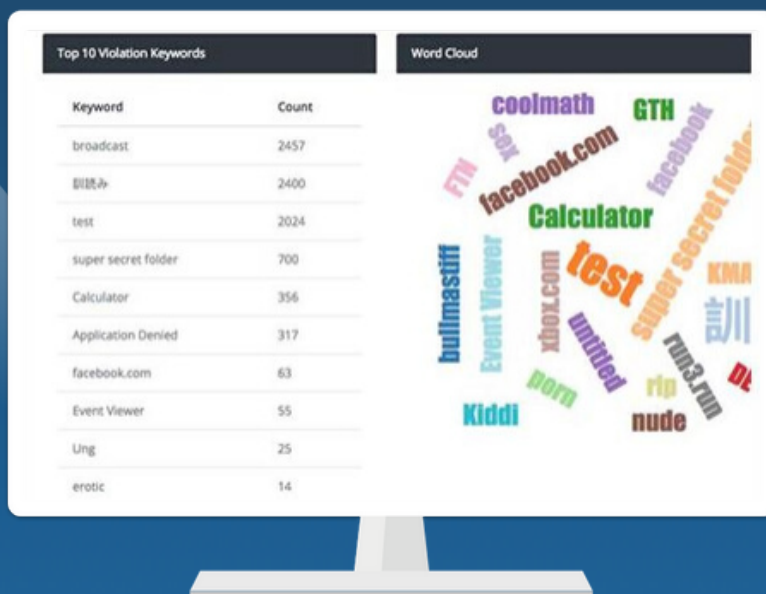

Send a message to one or many remote users.

✓ **Send file**

Send a file or document to any number of remote users. Files are stored in and downloaded from the cloud.

SENSO EDUCATION CHROME SAFEGUARD BUNDLE

Our next generation cloud-based safeguarding module aids schools in fulfilling their legal duty of care around online safety and safeguarding. Designed with the UK Government's Prevent duty, UK Safer Internet Centre, and the UK Department for Education, along with keywords and URL lists from the Internet Watch Foundation.

✓ Reporting and alerting

Receive weekly reports to gain a clearer insight into the number of violations made, which days were the most popular and more. Our weekly reports will help you to monitor and protect your devices wherever they are in the world.

✓ Multi-school reporting

Report across one or more schools centrally.

✓ Read only logs

Capture and review activity from all portal users.

✓ Roles based access rights

Take control of what your users can and can't access.

FEATURES:

- ✓ **Ban resources**
Quickly and easily block access to resources such as websites or website content. Built in functionality to set schedules on bans to turn on or off during specific class times.
- ✓ **Lock screen**
The lock screen feature can be used as a broadcast system to alert users on many or all devices with a custom message such as “Fire - Please Evacuate”.
- ✓ **Keyword violation logs & email alerts**
Keyword libraries developed with leading child protection charities such as the Internet Watch Foundation, are provided with Senso safeguard cloud. Senso will monitor student activity and create a screenshot violation, should a word or phrase matching those from the libraries is detected, and email alerts are sent to members of staff for critical or urgent violations.
- ✓ **Dashboard**
With a top-level overview of all violations across a single or multiple site setup, Senso can deliver unparalleled insight into the users' actions and behaviour. One click drill down improves speed and effectiveness to get to the core of the problem as quickly as possible.
- ✓ **Website activity logs**
Capture searches and browsing history of users and machines across your estate.
- ✓ **Anonymous concern reports**
Allows students to report issues, such as bullying, with options to include a screenshot or remain anonymous.
- ✓ **AI visual threat detection**
Uses advanced A.I. to analyse violation images to detect the presence of material from the following categories: Alcohol, Child Sexual Abuse, Drugs, Extremism, Gambling, Gore, Pornography, Swimwear/Underwear, Weapons.
- ✓ **Assists in reducing false positives**
Helps with directing attention to those violations which require it.

SENSO EDUCATION CHROME ENTERPRISE BUNDLE

Consolidation of Class & Safeguard bundles. Manage and monitor Chrome devices with live thumbnail views and easy remote installation of our solution through Google Admin Console. Manage content and access on devices with our full suite of Chrome tools.
