

Safeguard Cloud

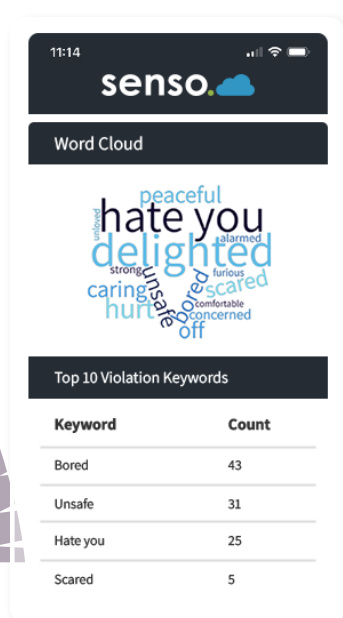

Enhancing your school's student safety capabilities.

Our cloud-based safeguarding software proactively monitors students using their school-owned devices to alert staff of vulnerable users, potential risks, and inappropriate or harmful behaviour.

Student Safety Tools

Our safeguarding software is able to deliver an unparalleled insight into a users actions and behaviours using advanced AI driven visual threat analysis.

✓ Enhancing your Online Safety Capabilities

Online monitoring that enhances your safeguarding efforts and abilities with comprehensive keyword libraries developed in partnership with expert organisations.

✓ Data, Trend Analysis and Reports

Supporting a focused, proactive and relevant online safety strategy.

✓ Prioritise Student Concerns

An intuitive management dashboard allowing you to prioritise and manage concerns with ease.

✓ Early Intervention

Students in crisis can be identified early, allowing for rapid intervention and support to be implemented.

Student Safety and Wellbeing

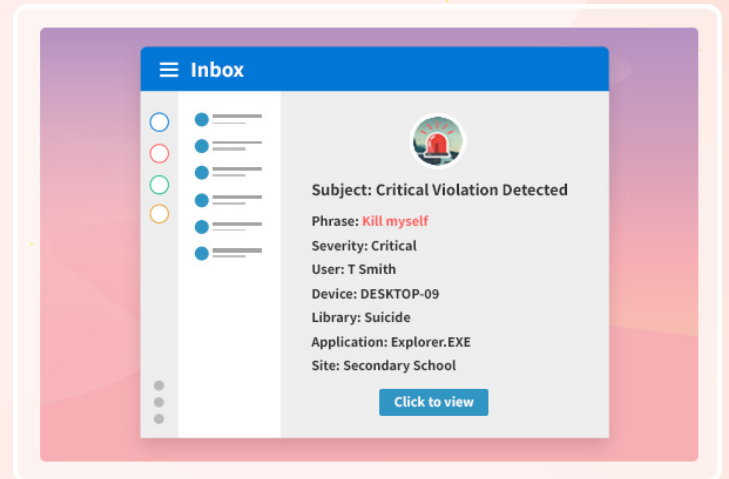

← Email Alerts

Email Alerts

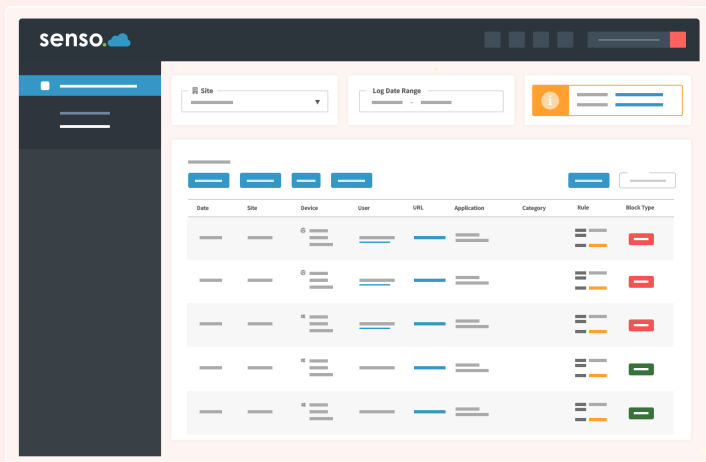

Senso will instantly alert you via email if any urgent or critical keystroke logs are triggered by a student.

Keywords

We work with leading charities to ensure the most up-to-date keywords are enhancing your online safety efforts and abilities. You can also add your own keywords that may be specific to your local area or school.

View Keystroke Logs ↗

Logging and Blocking

Records URL history and allows you to take screenshots based on the keywords entered by the user. This module can also ignore specific URLs and keywords if desired.

Raise Concern

Flagging concerning behaviour in real-time enables school counsellors to respond more quickly, helping to address potential issues before they escalate and offer support to students.

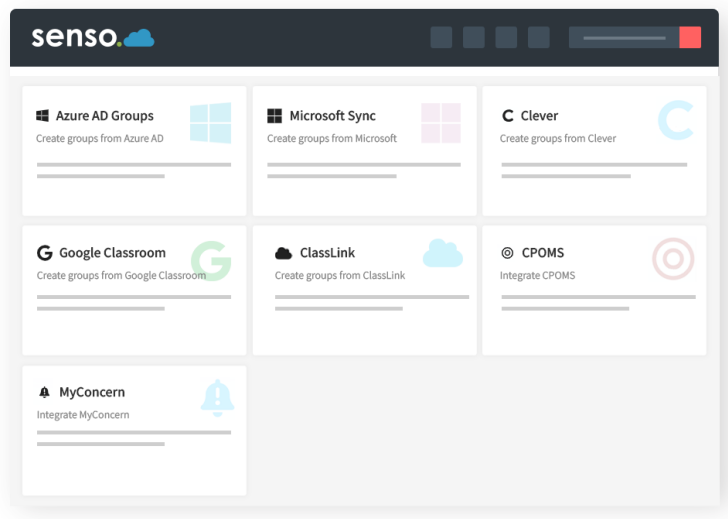

Client Updater

Update your client in just a single click or schedule an update for a more convenient time.

Acceptable User Policies

Acceptable User Policies for the user, shows the first agreed and last agreed information.

Google Classroom Sync

Automatically sync your school's groups.

Microsoft Teams Sync

Automatically sync your school's groups.

ClassLink

Import all of your classroom groups, giving staff members access to the correct groups and live thumbnails.

Azure AD

Allows access to grouping and user-based information.
Allows automatic sync to pull.

AI Driven Visual Threat Detection

Only Senso offers a visual threat intelligence feature as a standard component in its Safeguard Cloud bundle, providing early stage actionable intelligence to protect students, identify potential victims and prevent harmful content.

Visual content is everywhere - you can view, save and share easier than ever before. Senso provides a unique solution with visual threat technology driven by categories not general image labelling.
